SITUATION SUMMARY

Significant Events – National

US anthrax scare widens to 51 labs in 17 states

(BBC) More than 50 labs in 17 US states and three foreign countries have been mailed samples of live anthrax, Pentagon officials have said. The announcement on Wednesday doubled the number of incidents in the US. A smaller number of shipments were revealed last week. Staff members at some of the labs have been treated for anthrax exposure as a precaution, but no-one has fallen ill. The Pentagon has maintained there is no risk to the general public. The Centers for Disease Control and Prevention (CDC) is leading the investigation into the incidents. US defense official Robert Work told reporters that the number of affected laboratories is expected to rise. Experts in biosafety have heavily criticized the lapse and called for improved precautions. Symptoms of anthrax exposure include skin ulcers, nausea, vomiting and fever, and can cause death if untreated. The military has ordered all of its labs that have previously received inactive anthrax samples to test them. In addition it is advising all labs to cease working with these samples until told otherwise. Pentagon officials say there was no sign the live samples were sent due to any deliberate action. The samples were mailed from a Utah army facility by commercial post to laboratories over the past 10 years. In addition to the US labs, samples were sent to facilities in Australia, Canada and South Korea.

Significant Events – International

Mers: South Korea closes 700 schools after third death

(BBC) More than 700 schools in South Korea have been closed as a third person died from the Mers virus and the number of people infected rose to 35. South Korean authorities have been criticized over their response to the outbreak after one infected person went to play golf and another flew to China. More than 1,600 people have now been quarantined, according to officials. The outbreak is the largest outside the Middle East, where the disease first appeared in Saudi Arabia in 2012. Five more cases were confirmed on Thursday, the South Korean health ministry said, bringing the total number of known infections in the country to 35. The latest victim died in hospital after contracting the virus from another patient in the same room. About 160 of those quarantined have been isolated at state medical facilities but most have been instructed to stay at home and strictly limit contact with other people. The outbreak in South Korea is still confined to those with a link to the initial sufferer, but authorities are struggling to contain growing public anxiety. In Seoul the number of people wearing face masks on public transport and in crowded places has increased. And the Korea Tourism Organization said on Thursday that about 7,000 tourists - mostly from China and Taiwan - had cancelled planned group trips to South Korea. "A mass cancellation of this scale is very unusual... and many travelers cited the Mers outbreak as the main reason," a spokesman told the AFP news agency. The first case in this outbreak - "patient zero" - was a 68-year-old man who was diagnosed after returning from a trip to Saudi Arabia. He is still in hospital. Mers - which stands for Middle East Respiratory Syndrome - can cause fever, breathing problems, pneumonia and kidney failure. Experts believe it is not very contagious. Tan Wenjie, director of the virus department at the National Institute for Viral Disease Control and Prevention, said Mers could only spread "via close contact in a confined space". "And no evidence proves that it can spread through air, so people need not to feel panic," he added. There have been 1,167 cases of Mers worldwide, of which 479 have resulted in death, according to the European Centre for Disease Prevention and Control. Nurses at a hospital in China reportedly drew lots to determine who should treat the country's first case of Mers. The virus has a death rate of 27%, according to the World Health Organization.

SITUATION SUMMARY

Major Exercise in the Coastal Region

A Full Scale Exercise will occur at the Port of SF, Pier 1 today, 06/04/15. Their DOC will be fully activated. The scenario for this exercise will be a catastrophic earthquake. Inspectors will be in the field, and the scenario will include a potential fuel spill at the Hyde Street Pier that will require a full response. There will be a Cal OES coastal representative at the exercise.

SPILL: 15-3119 – Tar Balls, Surfside, Orange County

- On 06/03/15 at 2046 hours the California State Warning Center (CSWC) received a report indicating that numerous tar balls had washed ashore this evening (06/03/15) and yesterday (06/02/15) at Anderson Street to the jetty, Surfside, Orange County.
- The CSWC briefed the Cal OES Executive Duty Officer (EDO), Cal OES Fire Duty Officer (FDO), Cal OES Law Duty Officer (LDO), and Southern Duty Officer (SDO) and made a full notification pursuant to our Hazardous Materials SOP.

SPILL: 15-3121 – Tar Balls, Palos Verdes Peninsula, Orange County

- On 06/03/15 at 2104 hours the California State Warning Center (CSWC) received a report indicating that tar balls washed ashore, source is unknown at this time at Smuggler's Cove south side that faces Catalina Island, Palos Verdes Peninsula, Los Angeles County.
- The CSWC briefed the Cal OES Executive Duty Officer (EDO), Cal OES Fire Duty Officer (FDO), Cal OES Law Duty Officer (LDO), and Southern Duty Officer (SDO) and made a full notification pursuant to our Hazardous Materials SOP.

Harrison, Vegetation Fire, Riverside County

- Location: Ave 66 x Harrison, Thermal, Riverside County
- Jurisdiction: LRA
- Start Date/Time: 06/01/2015 at 1016 hours
- As of 06/03/15 at 1728 hours:
- 80 acres, 85% Contained
- Full containment anticipated on 6/5/2015
- Evacuations lifted
- No structures threatened
- No infrastructure threats at this time

SITUATION SUMMARY

Refugio ICP Update – Cal OES Southern Region Duty Officer

Refugio Unified Command to temporarily suspend night cleanups due to wildlife sensitivity

- Cleanup operations of tar balls on beaches in Santa Barbara, Ventura, Los Angeles and Orange counties have the potential to impact beach and near-shore animals including California grunions. Grunion spawning on sandy beach habitat is expected to begin June 2 and continue through June 3. Cleanup operations will not occur at night when the grunion spawning runs occur. Grunion eggs on shore emerge during the high tides at night, and cleanup crews will be instructed to minimize disturbance to the sand as much as possible during the grunion run period.

Aids/LifeCycle Bike Race – Santa Barbara and Ventura Counties 5/5 and 5/6/2015

- The Aids/LifeCycle Bike Ride is slated to move through Santa Barbara and Ventura Counties along U.S. 101 southbound on Friday, June 5 and Saturday, June 6. Unified Command met with the organizers of the event to discuss the scheduled event. Four courses of action resulted from the meeting for consideration to UC and event command and executive staff. Refugio Incident external affairs is jointly developing a plan with event organizers to include riders' safety and at the same time minimizing any potential impacts on response operations. To that end, two members of the Community Relations section will visit the Aids/LifeCycle Bike Ride camp in Lompoc on Thursday, June 4, to inform the riders on exercising safety precautions in the response area(s). Additionally, this safety information will be included in the event newsletter which will be distributed to each rider on the morning of the event.

SITUATION SUMMARY

Ventura County Spills – Cal OES Southern Region Duty Officer

- The Ventura County Operational Area Emergency Operations Center (EOC) activated at a Level I on 05/29/15 due to cleanup efforts of several Ventura County beaches (from San Buenaventura State Beach to Hollywood Beach) where tar balls have been reported ashore. Although it is unknown whether these tar balls are related to the Refugio Incident, a Ventura County representative will be present at the Incident Command Post (ICP) for Refugio and will team up on the ongoing sampling and testing of the tar balls to determine the origin and chemical makeup. The Cal OES Southern Duty Officer (SDO) will continue to monitor the incident.
- Per the Cal OES SDO, referencing the following Spill Reports: 15-3021, 15-3009, 15-3011, 15-3010, 15-2929, 15-2981, 15-2978:
 - Per the Ventura County OA EOC, as of 06/03/15 at 2030 hours, spill response strike teams continue to comb the Ventura County shoreline for oil and injured wildlife. The primary areas of focus for Wednesday's efforts included McGrath State Beach, Surfers Knoll and Ormond Beach. All three beaches were deemed "lightly oiled" by assessment teams however required remediation effort. Cleanup work at McGrath State Beach and Surfers Knoll was successfully completed under the watchful eye of an incident biologist and cultural sensitivity specialist, both of which are subject matter experts at working in sensitive habitats. Work in the area of Ormond Beach was slow due to its limited accessibility however forward progress was made. On Thursday June 4, crews will return to the area of Ormond Beach and the Ventura Harbor to finish their ongoing assessments and restorative work in the area. There have been no further requests for assistance and no unmet needs.

SITUATION SUMMARY

Los Angeles County Spills – Cal OES Southern Region Duty Officer

- On 05/27/15 at 1241 hours, the California State Warning Center (CSWC) received a report indicating a tar-like substance was observed on Manhattan Beach, Los Angeles County. The Beach Incident Command Post (ICP) is located at 2600 Strand, Manhattan Beach, CA 90266. The beach area was closed and Public Health placed signage indicating the closure of the beach area.
 - Per the Cal OES Southern Duty Officer (SDO) 05/29/15 at 2036 hours :
 - Per the LA County OEM Duty Officer, the Los Angeles County Public Health Department has declared the beaches safe for public use therefore Unified Command reopened El Segundo, Manhattan, Hermosa and Redondo Beaches for public use at 1830 hours on 05/29/15. The investigation continues to determine the origin and chemical makeup of the tar balls based on sampling collected by USCG and California Department of Fish and Wildlife (CDFW).
- Referencing the following Spill Reports: 15-2943, 15-3014, 15-3028, 15-3030, 15-3058:
 - On June 03, the Los Angeles County Office of Emergency Management (OEM) duty officer reported that cleanup efforts continue in Redondo, Zuma and Manhattan Beaches. Unified Command will continue to have the South Bay beach shorelines patrolled and monitored and the United States Coast Guard (USCG). The laboratory analysis of sampling material to determine the origin and chemical makeup of the tar balls is still pending. There are no requests for State assistance and no unmet needs.
 - On June 03, beaches in Long Beach were closed from First Place to 72nd Place after officials received reports of tar balls washing ashore.

Orange County Spills – Cal OES Southern Region Duty Officer

- On 06/01/15 at 1523 hours, the California State Warning Center (CSWC) received a report of tarballs washing onto shore at Huntington Beach, Orange County.
- Referencing Spill Report 15-3072:
 - Per Orange County EMB:
 - No concerns or beach closures
 - Common locally occurring event
 - No request for assistance or no unmet needs

SITUATION SUMMARY

SPILL: 15-2785, Refugio Beach, Goleta, Santa Barbara County

- On 05/19/15 at 1243 hours the California State Warning Center received a report from the Santa Barbara County Fire Department indicating that a ¼ mile sheen was observed off of Refugio State Beach, near Goleta, Santa Barbara County.
- On 05/19/15 at 1510 hours the NRC reported that Plains All American Pipeline advised that crude oil was discovered to be coming out of a transmission pipeline at a Culvert under Highway 1. Contractors responded to scene and the action line was shut in.
- The source of the spill was capped at approximately 1500 hours on 05/19/15, but a significant amount of oil reached the ocean at Goleta.
- Mission opened in Cal EOC: **2015-05-19 Santa Barbara Refugio Oil Spill Incident.**
- The CSWC conducted all appropriate notifications, including but not limited to local government agencies.

Proclamations

- Governor Brown Proclaims a State of Emergency in Santa Barbara County to Assist Oil Spill Response.
- <http://gov.ca.gov/news.php?id=18967>
- A Proclamation from Santa Barbara County has been received. The County is not requesting CDAA at this time.
- On 05/22/15 City of Goleta submitted a Proclamation of Local Emergency. The City is not requesting CDAA at this time.
- On 05/23/15 the University of California Santa Barbara submitted a Proclamation of Campus Emergency with no requests at this time.

Activations

On 05/27/15:

- The State Operations Center is activated at Level 1.
- The Southern Region Emergency Operations Center (REOC) is activated at Level 1.
- Santa Barbara EOC is activated at Level 3.
- The ICP, is now located at 461 S. Fairview Ave., in Goleta, and has an Operational Period of 48 hours.
- Ventura County OA EOC is activated at Level 1.

Missions

- 2015-SREOC-12905 - 05/30/15, Ventura County EOC requested four CMS boards, which were provided by Caltrans for seven days with the message: "BEACHES OPEN AVOID CONTACT WITH TAR/OIL VCEMERGENCY.COM" to be posted at the following locations:
 - La Conchita @ Santa Barbara Street – North Bound
 - Seacliff Off-Ramp / Pacific Coast Highway (Rincon Parkway) – South Bound
 - State Beaches Off-Ramp (101 NB North of Ventura) – North Bound
 - Las Posas Road @ HWY 1 – South Bound

SITUATION SUMMARY

SPILL: 15-2785, Refugio Beach, Goleta, Santa Barbara County

Deployments

- Unified Command
 - Federal on Scene Coordinator: US Coast Guard (USCG) & the Environmental Protection Agency (EPA).
 - State on Scene Coordinator: CA State Parks & CA Fish and Wildlife (CDFW).
 - Local on Scene Coordinator: Santa Barbara County Office of Emergency Management (OEM).
 - Tribal Coordination: Santa Ynez Chumash Tribe, Owl Clan Consultant representing the three Clans: Barbareno, Coastal and Southern Owl.
 - Responsible Party: Plains All American Pipeline LLC.
- Cal OES Deployments
 - Southern Deputy Regional Administrator
 - ESC from Cal OES Southern Region, Ports and Harbor Representative
 - ESC from Cal OES Southern Region, Agency Representative

Responding Agencies

Federal

- USCG, Pipeline and Hazardous Materials Safety Administration (PHMSA), EPA, US Fish and Wildlife, and NOAA.

State

- Cal OES, CA State Parks, Cal OSPR, CA Fish and Wildlife, Cal Volunteers, CA Department of Transportation, California Highway Patrol , University of California Santa Barbara and California Coastal Commission.

Local

- Santa Barbara County OEM, Ventura County Sheriff's OES, Santa Barbara County Fire Department, City of Santa Barbara, Santa Barbara County Sheriff , Gaviota Police Department, Santa Ynez Chumash Tribe, Owl Clan Consultant representing the three Clans: Barbareno, Coastal and Southern Owl.

Beach and Campground Closures

- Refugio Beach campground and El Capitan state beach will remain closed through 06/18/15 or until deemed safe and staged equipment is removed.

Road Closures

- Highway 101 – A single lane closure of the southbound 101 freeway west of Refugio Beach in Goleta will be implemented through Friday, 06/05/15 from 0900-1500 to accommodate heavy equipment in response to the cleanup efforts. However, the Aids/LifeCycle Bike Ride that is slated to move through Santa Barbara and Ventura Counties Friday, June 5 and Saturday, June 6 may hamper cleanup efforts.

Cal OES
GOVERNOR'S OFFICE
OF EMERGENCY SERVICES

SITUATION SUMMARY

SPILL: 15-2785, Refugio Beach, Goleta, Santa Barbara County

Tribal

- The Santa Ynez Chumash Tribe is impacted and has sent a representative to the ICP.
- Santa Ynez tribal elders will visit the ICP on Wednesday, June 3.
- A Southern Owl Clan representative is monitoring the area to advise crews regarding cultural sites in the impacted zone of this event.
- Cal OES Tribal Advisor reached out to the three Non-Federally-recognized Clans (Barbareno, Coastal and Southern Owl). Tribal Reps are working directly with Unified Command to ensure that cultural sites are being protected.
- The Responsible Party contracted certified licensed archaeologists. Chumash Tribe representatives are paired with the archaeologists to monitor activities to meet the requirements of under Section 106 of the Historic Preservation Act.

Access and Functional Needs

- Cal OES has coordinated a sign-language interpreter to assist with the Press Briefings.

Health and Medical

- California Department of Fish and Wildlife closed affected fishing areas.
- Center for Toxicology & Environmental Health, LLC (CTEH) is conducting air monitoring. There have been no reports of inhalation concerns and no records of chemicals that could cause long term health effects. No reports of injuries from public or responders.

Economic Impacts

- The Cal OES Southern Region and Individual Assistance Branch staff are coordinating the collection of data related to the economic impacts to locals businesses due to the oil spill. Cal OES has forwarded the Estimated Economic Injury Worksheet for Businesses to Santa Barbara County OEM staff to assist with this effort and determine if businesses within the County qualify for Economic Injury Disaster Loans (EIDLs).

Third-Party Claims

- A Third-Party Claims telephone number has been established for businesses and others to report economic losses or costs due to the oil spill. Claim Phone Number: 866-753-6391.

SITUATION SUMMARY

SPILL: 15-2785, Refugio Beach, Goleta, Santa Barbara County

Pipeline Information

- Per Cal OES Southern Region Emergency Operations Center 1700 hours Situation Report:
 - Per PHMSA, a Corrective Action Plan was submitted on 05/21/15. This required the Responsible Party to remove all oil from the pipeline within 10 days.
 - 550-600 barrels of product was removed from the pipeline which is equivalent to approximately 23,100-25,200 gallons.
 - The investigation of the pipeline will be ongoing for approximately four (4) months
 - Air quality monitoring is ongoing in the incident area. The Center for Toxicology and Environmental Health (CTEH) is conducting the air monitoring on behalf of the Responsible Party.
 - The exact amount of oil release is unknown but is estimated between 31,000 gallons to 101,000 gallons as a worst case scenario; originally estimated at 105,000. An estimated 600 barrels of product has been pumped from the pipeline in total to date.
 - The Federal On Scene Coordinator (FOSC) and the US EPA On Scene Coordinator (OSC) issued and cosigned an administrative order to the responsible party for the removal, mitigation, or prevention of a substantial threat of oil discharge to the responsible party.
 - Unified Command approved the plan to remove section of the ruptured pipe on 05/25/15. Work on the pipe has started and they have removed soil above the suspected breaking point.
 - The damaged pipeline section has been removed. Crews are in the process of assembling and assessing the new section of pipe.
 - A new section of pipeline was welded into place where the old section was removed.
 - Work on the new section of pipeline continued on June 01 as weld X-ray, weld sand blast and coating was completed. On June 2, the new section of the pipeline passed X-ray testing of the weld.
- [Refugio Oil Spill Preliminary Report received. Preliminary report attached.](#)

SITUATION SUMMARY

SPILL: 15-2785, Refugio Beach, Goleta, Santa Barbara County

Environmental Impacts

- The area is prone to natural oil seepage. Experts from NOAA conduct daily overflights to identify areas with sheen in the water. Samples are collected in these areas via skimmers to determine if the oil is of natural origin or in the environment as a result of the oil spill. In this area, a baseline of about 80-100 barrels (4,000 gallons) is produced naturally daily.
- Fishery Closure area expanded and now extends from Canada de Alegeria at the western edge to Coal Oil Point at the eastern edge and out to 6 miles seaward.
- California Department of Fish and Wildlife submitted a declaration of Fishery Closure on 05/21/15 due to a public health threat caused by the oil spill. OSPR has ordered a ban on fishing and the taking of shell fish in the spill area.
- The following locations are identified as sensitive sites in the Area Contingency Plan (ACP). These locations were evaluated and have undergone the following actions:
 - Gaviota Creek (Completed)
 - 400 feet of primary and secondary boom
 - Canada Del Alcatraz & Cementario Creeks (Completed)
 - Pre-impact debris removal
 - Arroyo Hondo Preserve and Creek (Completed)
 - 100 feet of swamp boom, 100 feet of absorbent boom
 - Refugio Creek, Spill Site (Boomed)
 - 400 feet of hard boom, 400 feet of absorbent boom
 - Corral-Las Flores Creeks (Completed)
 - Pre-impact debris removal
 - El Capitan Creek (Completed)
 - 40 feet of swamp boom, 40 feet of sorbent boom
 - Las Llagas (Completed)
 - 200 feet of sorbent boom, 200 feet of hard boom
 - Naples (Completed)
 - Pre-impact debris removal
 - Eagle Canyon Creek (Completed)
 - Pre-impact debris removal
 - 100 feet of sorbent boom, 100 feet of hard boom

SITUATION SUMMARY

SPILL: 15-2785, Refugio Beach, Goleta, Santa Barbara County

Environmental Impacts (Cont.)

- Tecolote Creek (Completed)
 - High natural berm confirmed
 - 400 feet of hard boom, 400 feet of sorbent boom
- Bell Canyon Creek (Completed)
 - High natural berm confirmed
 - 400 feet of hard boom, 400 feet of sorbent boom, additional boom was needed
- Devereaux Slough
 - Boom was not deployed due to Plovers
 - High natural berm confirmed
- Tajiguas Creek (Completed)
 - 200 feet of hard boom, 200 feet of sorbent boom
- Goleta Slough
 - 2,000 feet of hard boom, 2,000 feet of sorbent boom
- Arroyo Burro Creek (Completed)
 - 500 feet of hard boom
- San Buenaventura State Beach (Monitoring)
 - No cleanup action to be taken until cleared by EUL
- McGrath State Beach & McGrath Lake (Monitoring)
 - No cleanup action to be taken until cleared by EUL
- Hollywood Beach/Oxnard Beach (Monitoring)
 - No cleanup action to be taken until cleared by EUL

Wildlife

- The Oiled Wildlife Care Network (OCWN) continues to conduct wildlife monitoring and recovery efforts.
- As of June 02 at 2000 hours, CDFW reported recovery of 1 live bird (cumulative 58), 7 dead birds (cumulative 87) with a cumulative total of 145; and 1 live mammal (cumulative 40), 8 dead mammals (cumulative 53) with a cumulative total of 93.

SITUATION SUMMARY

SPILL: 15-2785, Refugio Beach, Goleta, Santa Barbara County

Response and Clean Up Efforts

- Per Cal OES Southern Region Emergency Operations Center 1700 hours Situation Report:
- An investigation of the shoreline has revealed approximately 51.70 miles of shoreline impacted by the oil spill. Total shoreline area impacted by the oil spill is approximately 40.30 miles. Impacts to the shoreline have been identified as follows:
 - A majority of the onshore oil impacts exist on beaches between Arroyo Hondo to the west and Point Mugu to the east.
 - As of June 02 at 2000 hours, offshore skimming operations resulted in 168 gallons of oily water mixture being collected, making the cumulative total of 12,167 gallons since the initial notification.
 - Four Shoreline Clean-up Assessment Teams (SCATs) have been surveying shoreline to assess extent of impact. Most areas are under 30% coverage.
 - Tar ball sightings have been observed on Ventura, Los Angeles, and Orange County beaches.
 - Oiled rock is being cleaned by scraping and ensuring that kelp or barnacles are not removed.
 - As of June 02 at 2000 hours, the following has been collected onshore:
 - 0 cubic yards of oiled sand (cumulative total 600)
 - 75 cubic yards of oiled vegetation (cumulative total 600)
 - 0 cubic yards of oiled debris/PPE (cumulative total 210)
 - 0 cubic yards of oiled soil (cumulative total 3,840)
 - 15 cubic yards of absorbent (cumulative total 105 cubic yards).
 - The majority of oiling is located in beaches, cobble, riprap, and on rock faces between Arroyo Hondo and El Capitan Beach. Light oiling has been discovered in Arroyo Burro to the east and 2 miles west of Arroyo Hondo in the west. These areas have been targeted for light mechanical and manual removal as needed. OSPR has approved the use of SaveSorb Peat Sorbent to assist with rock cleaning.
 - The Unified Command has an oiled waste plan in place for the removal and proper disposal of the sand, soil, vegetation and other debris from the cleanup area.
 - On June 02 as of 2000 hours, approximately 70.56 miles of shoreline was assessed, and of that:
 - 3.58 miles was heavily impacted
 - 19.69 miles was moderately impacted
 - 24.55 miles was lightly impacted
 - 4.91 miles was very lightly impacted
 - 11.04 miles was reported with tar balls
 - 3.70 miles was identified with no impact.
 - To date, the total miles of impacted shoreline are, 58.86 miles.

SITUATION SUMMARY

SPILL: 15-2785, Refugio Beach, Goleta, Santa Barbara County

Response and Clean Up Efforts (Cont.)

- A temporary flight restriction has been imposed within a 5-mile radius of Refugio Beach. As of June 01, the restriction encompasses a five-mile radius around the park with a 1,000-foot ceiling is now through June 06.
- NOAA Trajectory Analysis estimates show an area of scattered light oil off the coast starting from Heritage to Holly located north of Santa Barbara.
- Clean up efforts continue on a 24 hour schedule.
- Cal OES deployed staff were asked by Unified Command to obtain points of contact for CHP and CalTRANS for the AIDS Life Cycle Event and invite them to a meeting scheduled for 1700 hours on Monday, June 1, 2015 to discuss the logistics of the event as it is planned to occur on Friday, 06/05/15 along the 101 freeway where current Incident work activities are ongoing. Cal OES staff have been asked to participate in the meeting to be available to assist with ongoing coordination efforts.
- The ICP is overseeing operations from Gaviota in Santa Barbara County to Point Mugu in Ventura County.
- Dive operations were conducted off Refugio State Beach, no recoverable oil was observed therefore the underwater survey team will be demobilized.

SITUATION SUMMARY

SPILL: 15-2785, Refugio Beach, Goleta, Santa Barbara County

Resources

- Per Cal OES Southern Region Emergency Operations Center 1700 hours Situation Report:
- As of 0700 hours on June 2 there are a total of 1,202 personnel currently responding to the incident. There are 129 personnel in the ICP and 1,320 in field operations.
- Staging areas for the incident are located at Refugio State Beach, El Capitan East, and El Capitan West.
- There are currently 13 vessels and 1 barge being utilized to perform boom, skimming operations, and decontamination offshore. Vessels not currently in use are being staged in the Ventura Harbor.
- Approximately 2,540 feet of hard boom and 2,040 feet of absorbent boom (totaling 4,580) have been deployed to protect the ACP sites. About 6,000 feet of boom has been deployed by the on water recovery group. A total of 10,580 feet of boom is assigned to the incident.
- There are 2 contracted aircraft (helos) deployed to this incident.

Public Information

- Joint Info Center (JIC) has been established.
 - JIC WEBSITE: <http://www.refugioresponse.com>
 - Future media inquiries regarding Refugio State Beach oil spill should call: **805-770-3682**.
- A Third-Party Claims telephone number has been established for businesses and others to report economic losses or costs due to the oil spill: 1-866-753-3619.
- A Press Conference is tentatively scheduled for 1500 hours on 06/02/15.
- A Community Open House was held on Saturday, May 30 at the Elks Lodge in Santa Barbara. Over 180 community members attended the event as well as media. Over 65 questions and comments were placed in comments box and all of them were answered by technical experts.
- The Community Relations Unit is drafting a proposal for a roundtable discussion with key stakeholders of the Santa Barbara business community to include the Chamber of Commerce.
- Senator Feinstein's staffer, Molly O'Brien visited the ICP on June 2.
- Santa Ynez tribal elders will visit the ICP on Wednesday June 3.
- State Attorney General, Kamala Harris is expected to visit the ICP on Thursday, June 4.
- Congresswoman Capps is expected to visit the ICP and conduct a site visit or overflight on Friday, June 5.
- Paula Perotte, Mayor of the City of Goleta, and Janet Wolf, Second District Supervisor and Chair of the Santa Barbara County Board of Supervisors. – Surveillance Flight on Friday, June 5.

SITUATION SUMMARY

SPILL: 15-2785, Refugio Beach, Goleta, Santa Barbara County

Volunteers

- California Volunteers is leading the efforts to coordinate spontaneous volunteer activities related to the Refugio Incident. Volunteer activities are currently on hold. Cal Volunteers will continue to monitor the situation and identify any additional opportunities for volunteer beach cleanup events.
- The public can assist by visiting this website <https://calspillwatch.dfg.ca.gov/Spill-Archive/Refugio-Incident/Volunteer> or by reporting oiled wildlife by calling 877-UCD-OWCN (not a volunteer line).

SITUATION SUMMARY

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

Weather of Concern

- There are no significant Watches or Warnings in effect at this time

Active Weather Warnings, Watches and Advisories by County: http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

A series of upper level low pressure systems will bring chances for showers and storms across interior northwest California through early next week. High temperatures across the interior will warm much above normal Friday through early next week while seasonal temperatures persist near the coast.

Medford Weather:

A low moves south-southeast over northern California, with closer proximity to the low, the probability of showers and thunderstorms will remain highest over northern California today then from around Mount Shasta northeast and Modoc County on Friday. The two other main weather items of interest are winds and high temperatures. Gusty/breezy to windy northerly winds will be strongest at the coast, in the Shasta valley, and across the east side during the afternoon and evening hours and Friday. A strong warming trend will continue into early next week with each of Saturday through Monday likely to be the hottest day of the year so far.

Reno Weather:

Showers and thunderstorms are expected Thursday as low pressure moves into California. Some storms may produce locally heavy rain and small hail. The low will linger into the weekend with a chance for showers and thunderstorms each day.

San Francisco Weather:

An upper level low will move over the region for cooler temperatures and partly cloudy skies. A slight chance of thunderstorms will exist over portions of the North Bay this afternoon. Otherwise, most locations will remain dry through the week with temperatures generally below seasonal averages.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Upper low closing off to the north of the bay area early this morning resulting in a few showers and thunderstorms across the north end of the Sacramento valley and along the Sacramento valley edge of the coast range. Light onshore flow continues through the Delta, and all the clouds continue to result in mild temperatures with readings in the mountains in the 40s and 50s, with 50s to lower 60s through most of the central valley (north end is in the mid-60s to lower 70s). The low is forecast to drift south along the central California Coast today, into southern California on Friday and over southern Nevada during The weekend. Plentiful mid and upper-level moisture is expected to linger across the region into next week, and combined with daytime heating, expect to see a rather active period of mountain showers and thunderstorms. Daytime temperatures expected to rise across the area over the weekend as the low drifts further away and high pressure begins to build to our north, but cloud cover should temper readings somewhat.

Hanford Weather:

Near normal temperatures will continue through the upcoming weekend. A chance of mainly mountain showers and thunderstorms will begin on today and continue through the weekend.

WEATHER

WEATHER SYNOPSIS BY REGION:

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Upper level low pressure will approach the region today, and then drift slowly across the area tonight and Friday. There will be plenty of clouds through Friday. Some drizzle or light rain is possible from the coastal slopes westward today, and then there is a slight chance of showers tonight through Friday evening. There could be a thunderstorm in the mountains Friday. A building ridge will bring a warming trend to the region Saturday through Monday, with a decrease in cloudiness. Temperatures will likely remain above normal through the middle of next week.

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

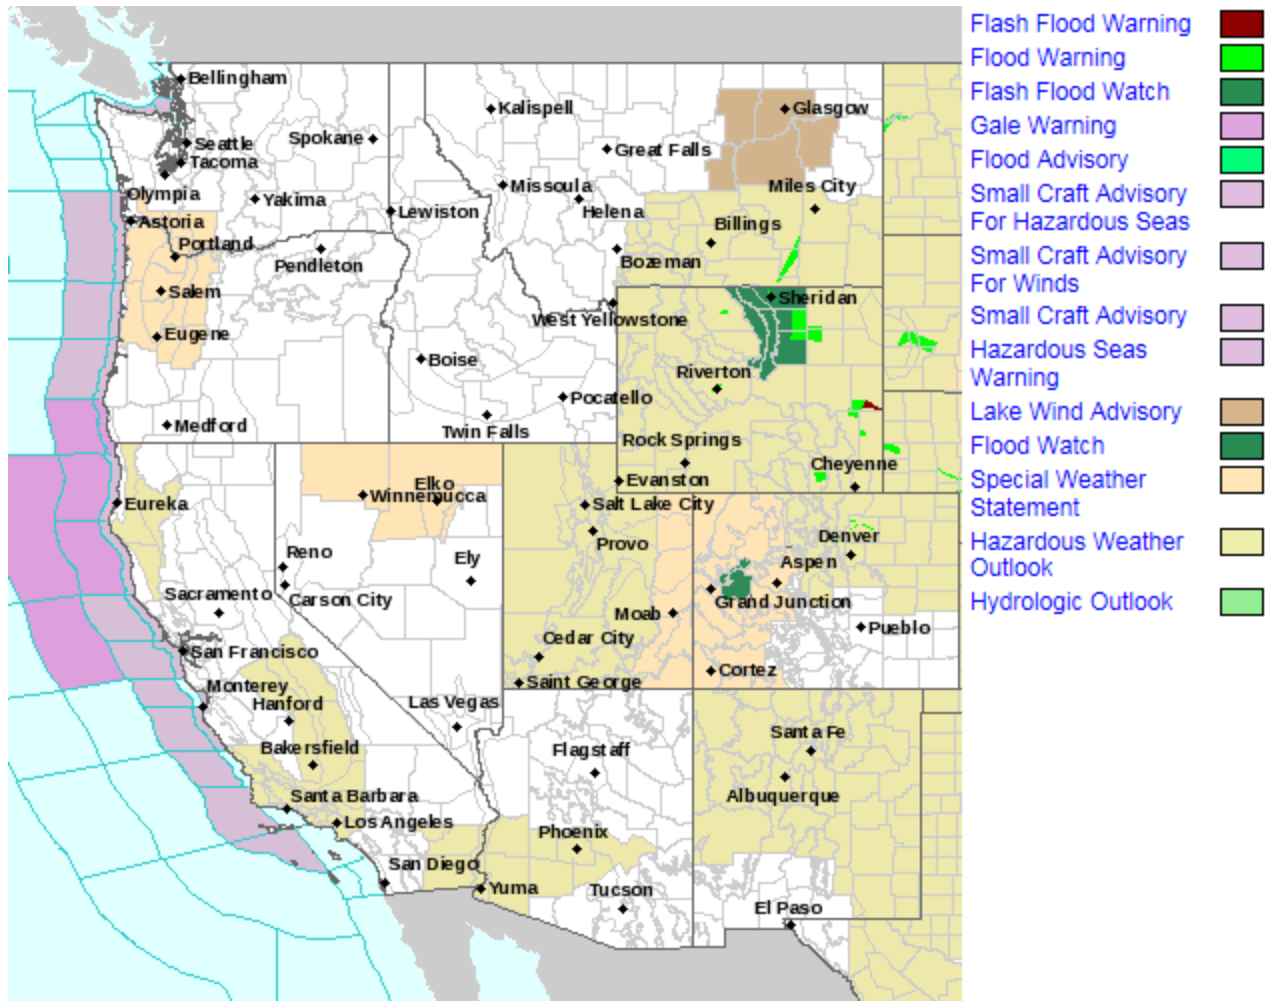

A low pressure system will bring cool weather with some drizzle and occasional light showers for much of the remainder of the week. Temperatures will continue to be below normal. Low pressure will weaken over the weekend as a high pressure center over northern Mexico builds northwest into southern California and brings warmer weather with decreasing cloudiness. Moisture associated with the remnants of Blanca, a hurricane now about 1600 miles southeast of San Diego, could bring some showers around Tuesday of next week.

Southeast California Weather:

A late season pacific low pressure system will draw tropical moisture northward today, resulting in higher than normal rain chances tonight through Saturday. After a brief cool down Friday and Saturday, temperatures will recover Sunday. Relatively moist conditions will persist through next week, with isolated showers and thunderstorms possible by Tuesday.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC, Inland, Coastal, and Southern REOCs and the Santa Barbara County EOC are activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Regional (Inland, Coastal, Southern) conference calls continue to occur on a weekly basis.
